a
Annotation effects (one-step model)
y = 0.07x + 0.036 ; r2 = 0.12
Estimated annotation effect
Simulated annotation effect
b
Gene ABFs (one-step model)
y = 0.114x + 0.0021 ; r2 = 0.2
Estimated gene indirect ABF
Simulated gene indirect ABF
c
Annotation effects (full model)
y = 0.15x + 0.069 ; r2 = 0.19
Estimated annotation effect
Simulated annotation effect
d
Gene ABFs (full model)
y = 0.187x + −0.18 ; r2 = 0.27
Estimated gene indirect ABF
Simulated gene indirect ABF
